For ease of ordering we have created complete packages in our most popular styles, including both flat and curved glass options. Based on the tray size and shape selected, each package contains the relevant panel/s, wall post, fixings, shower tray and a 90mm hi-flow waste and trap, with flow rated at 42 litres per minute. Additional package option to upgrade wall post and fixings to a choice of special finishes.

- Flat and curved panels available
- 8mm and 10mm toughened glass
- Perfect for use with a shower tray or fit directly to a tiled floor
- Generous 1952mm height
- Extensive choice of panel sizes
- Optional fixed or hinged Deflector Panels
- Fixings available in silver and special finishes
- High quality support brackets in standard or slimline option
- Unique crystal glass-to-glass SmartSeal Technology

Merlyn Mbox 1 Door Quadrant 1900mm Height Shower Enclosure

More Sizes Available

The Merlyn Mbox 1 Door Quadrant 1900mm Height Shower Enclosure is CE approved as well as easy to install and use. A reversible design that can be fitted to the right or left-hand side, this unit includes quick release double rollers for easy cleaning and is coated in a Mershield Stayclear coating that assures it always looks stunning in appearance. Available in several different size options and offering up to a 20mm adjustment per the wall profile, this product is created from 6mm thick toughened safety glass allowing it to last and function perfectly for as long as possible.

Mershield Stayclear

Merlyn treats products in the Ionic Collection with a special protective coating to ensure the glass maintains its sparkle. This comes as standard on Essence, Express, Wetroom Panels and most of our Bath Screen ranges.

Mershield Stayclear acts as a protective coating which when applied to glass, helps the glass to remain shiny and new without the need for tiresome cleaning. When cleaned correctly it helps prevent the build up of limescale and soap deposits making the shower glass "Easy to Clean". Please see tips for keeping the glass in pristine condition.

Natural glass surface.

Mershield coating creates a smooth layer over the surface of natural glass, lowering surface friction, making it easier for water, soap and lime deposits to run off the glass.

Tips on how to keep your glass in pristine condition

It is important to clean your glass after every use – wipe down with a soft cloth.	Ensure that any residual water on the glass is removed after every use.
Install the enclosure in a well ventilated area.	Clean the glass regularly using soapy water.
Do not allow limescale to build up in hard water areas.	DO NOT use abrasive products on any surfaces.

MERLYN
